## COMPUTER SCIENCE

### BACHELOR OF SCIENCE IN COMPUTER SCIENCE (B.S.C.S.)

*(Minimum of 120 credits required)*

#### **Admission Requirements**

All students must meet the minimum admission requirements of the University. Please refer to the [Admissions section](#) of this catalog.

All students must meet the preprofessional requirements listed [above](#) in order to be accepted into the Computer Science program.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the Intellectual Foundations Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not listed with the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

#### **Degree Requirements**

The minimum number of credits required for the Bachelor of Science in Computer Science (B.S.C.S.) degree is 120 credits. All courses that count toward the degree must be completed with a grade of "C" or better. This degree will be awarded to students who satisfy all admission and degree requirements for the department. Items below are referenced in the table following the list. This degree program is available in person and fully online.

1. Students entering FAU with fewer than 30 credits must satisfy the course requirements specified in the catalog section, [Degree Requirements](#). Students entering FAU with more than 30 credits (transfer students) must see the undergraduate advisor for an evaluation of courses taken at another school. The general education requirements are satisfied

normally if a student has an Associate in Arts (A.A.) degree from a Florida community or state college.

2. At least one course must have a laboratory component.

**Pass/Fail Grades: Courses** taken as pass/fail are not accepted for Computer Science students.

## Electives

All students must take ~~15~~ 18 credits of approved elective courses. Certain 3000- and 4000-level courses offered by the Electrical Engineering and Computer Science Department may be taken as Computer Science electives. Certain 5000- or 6000-level courses offered by the Electrical Engineering and Computer Science Department may be taken as Computer Science electives. Students must see an advisor for a current list of approved elective courses.

***One of the The following courses may be taken as a Computer Science elective.***

Professional Internship	IDS 3949	0-3
Directed Independent Study	COT 4900	1-3

**Professional Internship**

**Students must have completed COP 3410, Data Structures and Algorithm Analysis with Python with a minimum grade of "C" before being eligible to register for a professional internship. Approval through the Career Center is required prior to enrollment. Students are permitted to take no more than the equivalent of one course (3 credits) to satisfy degree requirements.**

**Directed Independent Study**

Students must have completed COP 3530, Data Structures and Algorithm Analysis, with a minimum grade of "C" before being eligible to register for directed independent study. Students are permitted to take no more than the equivalent of one course (3 credits) to satisfy degree requirements.

Students must make sure that they have the necessary minimum of 120 credits for graduation.

**Sample Four-Year Program of Study**

For the sample four-year program of study for the Bachelor of Science with Major in Computer Engineering, refer to the [Curriculum Sheets and Flight Plans](#) by major.

## SECOND BACHELOR'S B.S.C.S. DEGREE

This program is for those individuals with a degree in another discipline who are seeking a Bachelor of Science in Computer Science degree at FAU.

### Admission Requirements

Students seeking a bachelor's degree or graduate degree in another discipline must satisfy all admission requirements of the first bachelor's degree in Computer Science at FAU.

### Degree Requirements

1. Earn a minimum of 30 credits in residence at FAU, at the 3000 level or higher, beyond those required for the first degree. Students earning two degrees simultaneously (a dual degree) must earn at least 150 credits.
2. Earn at least 75 percent of all upper-division credits required for the major from FAU.
3. Students must have completed at least 15 credits in mathematics including discrete mathematics with mathematical rigor at least equivalent to introductory calculus. Each course must be completed with a minimum grade of "C."
4. Students must have completed at least 6 credits (or equivalent) in natural science coursework intended for science and engineering majors. At least one course must have a laboratory component. Each course must be completed with a minimum grade of "C."
5. Students must complete **54 51** credits of core courses listed in the Computer Science degree program. Each course must be completed with a minimum grade of "C."

## COMPUTER SCIENCE UNDERGRADUATE MINOR

*(Minimum of 15 credits required)*

The minor in Computer Science is available to all FAU undergraduates who are not majoring in Computer Science or Computer Engineering. This minor requires completion of five courses (15 credits) with a minimum grade of "C." Students must ensure that they have completed the prerequisites for the selected courses.
