Royalties: money received from companies for royalties on patents. This money is distributed back to the inventor, and the Research Corporation based on the distribution formula. The restricted portion consists of the total royalty payments received and distributed back. Of this total, an estimated \$110,547 remains in the Research Corporation which is then classified as unrestricted revenue. This money is used to cover the operating expenses of the Research Corporation including the annual audit and other operating expenses. Royalties are generated from Edge Tech, Interact and OP Solutions.

Investment: To provide up to 20% of unrestricted net assets or \$100,000 to invest into Tech Runway startup companies.
