

**EPGRAD Program** is an **exciting paid summer research opportunity for undergraduates** who are **studying medicine, science, technology, engineering, and mathematics (MSTEM)** that will take place at both **George Washington University and Boston University** during June and July 2025.

The goal of the EPGRAD Program is to foster interest in pursuing careers in Alzheimer's Disease and related dementias (ADRD) research. The program is funded by a grant from the National Institutes of Health (NIH). Students will receive training in data science and epidemiology; will participate in a research project on ADRD; participate in journal clubs and research seminars; receive guidance on graduate school admissions and career preparation; and will participate in a host of fun social activities throughout the summer. **Participants will receive a stipend, travel costs, housing, and funds for meals.**

**The application deadline is February 7, 2025.** The application can be found at the EPGRAD Program web page along with more information about the program:

<https://publichealth.gwu.edu/programs/epgrad>.
