Subject: RE: New course in Economics

Monica:

ITOM has no objections, as long as the course clearly teaches the data management with Economics data and STATA and limits the lectures in Excel to no more than 20% of the course.

If Economics finds that its Bachelor of Science students need Excel, rather than STATA, then they will have to enroll in ISM 3011.

Teaching another excel course in another department duplicates the courses and is not a financially viable model for the college

Best Regards:

Tamara

Subject: RE: New course in Economics

Hi Tamara,

Neela revised the syllabus. I have enclosed the updated version for your review and would greatly appreciate your feedback. I would like to include this new course for approval at the next Undergraduate council committee meeting. I need to submit materials by tomorrow.

Regards,

Monica
